

## Introducing IntegraSeal Caps with Molded O-Rings

New technology molds the O-ring directly into the cap, eliminating potential contamination from outsourced O-rings or operator handling.

Securely bonded. The O-ring can't fall out.

NO possibility of double O-rings.

100% inline optical inspection ensures quality.

**No contamination** from outsourced materials or handling.

2008-40

## IntegraSeal<sup>™</sup> Caps

- Medical-grade polypropylene with an inert TPE O-ring molded directly into the cap.
- Available in standard cap or tethered.
- Available in colors for branding or organization.
